**WHO WE ARE** PRO Shocks is a manufacturing company that has been building shocks, servicing our customers and delivering championships for over 30 years. The key to our success is attention to detail. Our shocks are carefully built to strict tolerances to ensure maximum value and performance. We back up our suspension components with talented sales, tech and customer service personnel to ensure you receive the product you want, the answers you need and the support you demand.

## **PREMIER DESIGN & ENGINEERING**

Our great products start with the best design and engineering people. Our engineering team is one of the most experienced in the industry. PRO Shocks products are known for reliability, performance, value and innovation. Before we ever release the first iteration of a new product, we use a combination of: vehicle data collection tools, 3-D design software, extensive CAD modeling, finite element analysis testing, laboratory testing and extensive field trials to make sure you are getting the best product for your money. We spend countless hours on the road testing and refining our products at the tracks with our customers so you can be sure our products will work as advertised every time!

## **MANUFACTURING EXCELLENCE**

We have built a winning reputation by manufacturing and building quality suspension components for over 3 decades. Producing shocks that win on all levels starts with a comprehensive knowledge of chassis dynamics. From there, stringent tolerances are held during the assembly and dyno process so that the finished product performs better than expected. At PRO Shocks, winning is something we enjoy doing every day. Success starts with attention to detail and ends with you.

## **PERFORMANCE DRIVEN**

The PRO Shocks reputation for building winning racing and performance shocks begins with the company's comprehensive knowledge of chassis dynamics. The proven performance that makes PRO Shocks suspension systems famous for quality comes from a precision manufacturing environment.

## **UNRIVALED CUSTOMER SERVICE & TRAINING**

Building a program that has been an industry leader for over 30 years starts with great people. The sales, tech and customer support team is made up of dedicated, race oriented professionals who understand the industry, the need to get it right and the desire to serve. Our goal is to offer excellent service.

## **WINNING PRODUCTS**

The PRO Shocks advantage is available in thousands of products for a wide range of applications. The common thread that ties all PRO Shocks products together is performance. PRO Shocks products are built to perform because we like to win! Manufacturing a second place product just doesn't interest us. Our unrelenting passion to be the best is the reason professional racers have relied on PRO Shocks products for over 30 years!

PRO Shocks is proud to offer the latest addition to its product line, the G-Series Small Body Monotube Gas Sprint Car Shocks. The all new G-Series Shocks feature the latest in Monotube shock technology - along with many other improvements - utilizing over 30 years of Sprint Car shock development knowledge. The internal components of the shock feature a new three-piece piston and basevalve designed to balance internal pressures. This winning technology yields the industry's best hysteresis levels for maximum traction and driver feel in a lightweight, gas shock package.

- *Balanced internal pressures through extensive research and development.*
- *Newly designed piston and basevalve for optimized hysteresis.*
- *One of the lightest shocks on the market.*
- *Double-Digressive and Linear-Linear piston options.*
- *New basevalve with tuner-friendly deflective disc technology.*
- *Available in compression or rebound adjustable.*

## HOW TO ORDER YOUR G or GC SERIES SINGLE ADJUSTABLE SHOCKS

To order the shock combination you want, construct your shock part number by following the charts below. The shock series is the first designation, then the stroke length number. Next, choose the compression valving number and then the rebound valving number. See examples below.

### REBOUND ADJUSTABLE EXAMPLE

SHOCK SERIES	+	STROKE LENGTH	+	COMPRESSION NUMBER	+	REBOUND ADJ NUMBER	+	DIGRESSIVE/LINEAR PISTON (D/L)	EXAMPLE PART NUMBER

## PRO 4-WAY SERIES

(ALUMINUM BIG BODY WITH GAS CANISTER)

### 4-WAY ADJUSTABLE

The engineers at PRO Shocks designed the new 4-way with performance and function in mind. The shock features the same traction enhancing technology found in all PRO Shocks, but is fully high and low speed adjustable on both compression and rebound. Consistency is enhanced by the recirculating, single circuit valve design. Unlike other adjustable shocks, the hysteresis is minimized and remains low regardless of the adjustment position or range. This allows a wide adjustment range without sacrificing performance. The shock is designed to fit many existing applications. Its compressed and extended lengths are in line with industry standards and the adjustable eyelet and canister position allows for maximum mounting clearance. This series is ideal for front or rear applications on many pavement cars.

- Fully independent high and low speed adjustments for both compression and rebound.
- All adjustments affect the pressure drop across the main piston, eliminating the need for a basevalve.
- Single-circuit, recirculating design allows for large adjustment range with extremely low hysteresis.
- Solid main piston allows for reduced gas charge pressure without the risk of cavitation.
- Nitrogen bladder design enhances response and reduces stiction-induced hysteresis.
- Universal mounting design has 32 different options.
  - 8 position, indexable gas canister.
  - 4 position, indexable body eyelet.
- Compact - compressed and extended lengths comparable to most std. shock lengths on the market.
- Custom tuning to meet the racer's needs.

## NEXT GENERATION TWIN TUBE SERIES (ALUMINUM BIG BODY) **AR1 SERIES NON-ADJUSTABLE**

PRO Shocks has redesigned our Big Body Non-Adjustable series with speed and tunability in mind. The AR1 Series features fully machined components including valves, sealing surfaces, and compression head. With more precision parts, we are able to isolate compression and rebound bleed circuits to reduce fluid bypass in the system. The AR1 Series is available in 6", 7", 8", and 9" lengths and is now available with a smooth or threaded body.

- Fully machined and rebuildable basevalve.
- Steam treated piston with machined sealing surfaces.
- Precision components for greater consistency and increased repeatability.
- Custom tuning to meet the racer's needs.

### A SERIES DOUBLE ADJUSTABLE

A Series  
Double Adjustable:  
**\$545.99**

This new racing shock technology from PRO Shocks has a redesigned valve body for more repeatability and tunability at the race track. These shocks offer the widest range of adjustment available on the market and have a proven, no-leak sealing system. The detent system promotes a positive adjustment feel and provides better repeatability when setting the shocks at the track. The click adjuster enables the rebound to be reset each time. The rebuildable housing improves the life of the adjuster, with yearly maintenance recommended.

- New valve body with 38 clicks of adjustment for fine tuning.
- Widest range of shock adjustment available on the market.
- The 2-piece valve body improves serviceability of seals and reliability of internal components.
- A proven, no-leak sealing system.

Through on-track testing and in-house dyno evaluation, this entire product line has been treated to improvements. From the smooth body and threaded body, non-adjustable version, PRO Twin Tube Shocks are carefully hand-built, serial numbered and dyno tested. Each aluminum PRO Twin Tube Shock comes with a serial numbered dyno graph.

The valving of the small body series has the same quality damping curves as the proven non-adjustable big body series. PRO Shocks carries all of the popular valving combinations and custom valving options are available. Call PRO Shocks for details.

- Provides superior driver feel for ultimate traction.
- Rebuildable and revalvable.
- Hand-built, one at a time.
- Dyno sheets included with every shock.
- Bearings, travel indicator, and jam nut included.

PRO Shocks delivers the ultimate coil-over Hot Rod shock in the ASB/SR Shock Series. Featuring an all aluminum body and 3-position rebound adjustable valving, every Hot Rod deserves the plush ride delivered by the ASB/SR shocks.

The true benefits from these shocks can be found in the adjustable valving. These shocks can be adjusted from "Soft" for a lightweight car, to "Firm" for a heavier ride, to match the exact valving to the needs of your Hot Rod. Additionally, the aluminum body can be polished to a high luster to accent the looks of your Hot Rod. The ASB/SR Series shocks are available in a wide variety of mounting lengths and urethane end options.

- Adjustable from "Soft" to "Firm".
- Aluminum billet construction.
- Great shock from "T-Bucket" to "Lead Sled".
- Polished finish available by request.
- Must install with shaft pointing up to work properly.

**HOW TO ORDER YOUR SHOCKS**

To order the shock combination you want, construct your shock part number by following the chart below. The shock series is the first designation, then the stroke length, body type, mount type and finally the optional polished finish and/or small body. An example part number for non polished would be ASB/SR3AB. That same part number in a polished small body would be ASB/SR3ABPS as shown below.

SHOCK SERIES	STROKE LENGTH	BODY TYPE (A=ALUM.)	MOUNT TYPE	POLISHED FINISH OPTION	1-7/8" COIL-OVER KIT
ASB/SR	3"	A	B*	P	S

\*MOUNT TYPE OPTIONS: B = 1/2" BEARING, B58 = 5/8" BEARING, U = 1/2" URETHANE, U58 = 5/8" URETHANE.

#### HOW TO SPECIFY YOUR SHOCK

Using the compressed and extended lengths taken from existing shocks may not be the most accurate solution for your vehicle. Set the vehicle at the desired ride height and measure from the center of the upper shock mount to the center of the lower shock mount to determine the length of shock needed and determine your specific mounting configuration. This method of measuring shock lengths works in both coil-over and non-coil-over applications. If a measurement should fall between shock lengths, choose the shock that gives you the most compression travel. Refer to the diagrams and charts on pages 34 and 35 for the ASB/SR shock lengths to fit your application.

**ASB/SR SERIES****(ALUMINUM SMALL BODY)****MUSTANG II COIL-OVER**

ASB/SR Series  
Starting At:  
**\$159.99**

PRO Shocks ASB/SR Series (aluminum 3-position rebound adjustable shocks) offer unmatched quality and ride control. These shocks feature direct bolt-in fitment with no modifications necessary. Additionally, since this shock package is a true coil-over, you can make ride height changes simply by turning the adjuster nut. The valving can be fine-tuned for precise ride control from the "Soft" setting for light cars, to the "Firm" setting for an aggressive ride or a heavier car.

- All aluminum construction.
- 3-position valving adjustment for precise ride control.
- Coil-over design for infinite ride height adjustment.
- Available in 4 different mounting lengths for optimum fitment.
- Coil springs are available in multiple rates for smooth ride control.
- Polished finish available by request.

Soft, Medium & Firm  
Adjustments.

**SEE PAGE 41 FOR DYNO CHARTS.**

**HOW TO CHOOSE YOUR SHOCK LENGTH**

The instructions below are general in scope and cannot encompass every application. To determine the stroke length you need for your application:

- 1 Set your vehicle at desired ride height.
- 2 Measure from the center of the mount locations.
- 3 Match your length at ride height to the table on the next page.

## ASB/SR SERIES (ALUMINUM SMALL BODY) MUSTANG II COIL-OVER

### HOW TO SPECIFY YOUR SHOCKS

Using the compressed and extended lengths taken from existing shocks may not be the most accurate solution for your vehicle. Set the vehicle at the desired ride height and measure from the center of the upper shock mount to the center of the lower shock mount to determine the length of shock needed and determine your specific spring type. This method of measuring shock lengths works in both coil-over and non coil-over applications. If a measurement should fall between shock lengths, choose the shock that gives you the most compression travel. Refer to the charts on the following pages for our shock lengths to fit your application.

ASB/SR Series

ASB/SR6AM2T	11.5" / 17.5"	6"	15"	TAPERED - SOLD SEPARATELY

For polished shocks add "P" to the end of the part number. An example of a part number for non-polished may be ASB/SR3AM2. That same part number in a polished finish would be ASB/SR3AM2P.
